International Home Care & Rehabilitation Exhibition

## Best Wishes for the New Year

**To promote social inclusion, the development and spread of welfare equipment and the promotion of information sharing are expected.**

Entering the 2020s, the so-called baby-boom generation will be 75 years old within 5 years, and the aging of the birthrate will further accelerate in our country. Due to this, care needs are expected to further increase in the future, and there are concerns about the shortage of care workers. In order for the elderly and the disabled to maintain an independent life in the community, it is necessary to create a symbiotic society where local residents can live by supporting each other.

The SDGs, known as the Global Goals, set to achieve by the year 2030 to ensure prosperity for all as part of a new sustainable development agenda. Achieving the SDGs requires the partnership of governments,

private sector, civil society and citizens alike to make sure we leave a better planet for future generations. Good health and Well-being to Ensure healthy lives and promote well-being for all at all ages. In Japan, SDGs Promotion Headquarters has been set up in the Cabinet, and the Japanese government has been carrying out functions such as implementation, monitoring and review.

Society 5.0, which was launched as a policy by the Cabinet Office, is aimed at the realization of an information society that includes solutions to issues arising from the declining birthrate and aging population, as all people and things are connected via IoT and various knowledge and information are shared. This policy, which aims to achieve both economic development and the resolution of social issues, is also aimed at making it possible to reduce the burden of nursing care with robot support.

Based on the philosophy of the SDGs, H.C.R. is designed to provide a variety of nursing care with a view to promoting Society 5.0 so that the elderly and people with disabilities can live a healthy life while participating in the community, provide opportunities to collect welfare equipment information to meet support needs, etc., and strive to provide a wide range of information, including welfare equipment, to promote the creation of a welfare workplace environment that is easy for nursing staff to work.

**Aiming for an exhibition that contributes to the creation of a universal design society by striving to provide a wide range of information and welfare equipment that meets diverse needs.**

With the Tokyo 2020 Olympic and Paralympic Games being held, the creation of a symbiotic society based on universal design will be promoted in collaboration with the Cabinet Office and ministries.

This year, the 47th International Welfare Equipment Exhibition HCR will showcase the latest welfare equipment in Japan and overseas, as well as appropriate selection and use of welfare equipment, social security systems related to welfare equipment, trends in overseas welfare systems, ICT, We aim to create an environment in which a wide range of people visit more than usual to satisfy the needs of the welfare

equipment market by providing an environment that makes it easier for welfare staff to use robotic care support equipment.

H.C.R. 2020 will be again held at West and South Exhibition Halls of Tokyo Big Sight, for reasons ascribed to the venue. We will make further efforts to ensure safe and smooth operation.

We remain grateful to continued interest and support of visitors, exhibiting companies and organizations, and other related parties in organizing H.C.R. 2020.

# Report on the 46th International Home Care & Rehabilitation Exhibition 2019

(honorific titles are omitted.)

	12:30-13:30	ASICS Trading Co.,Ltd.
	14:30-15:30	metos inc.
Room D	10:30-11:30	Pacific Supply Co., Ltd.
	12:30-13:30	SMS Co.,Ltd.

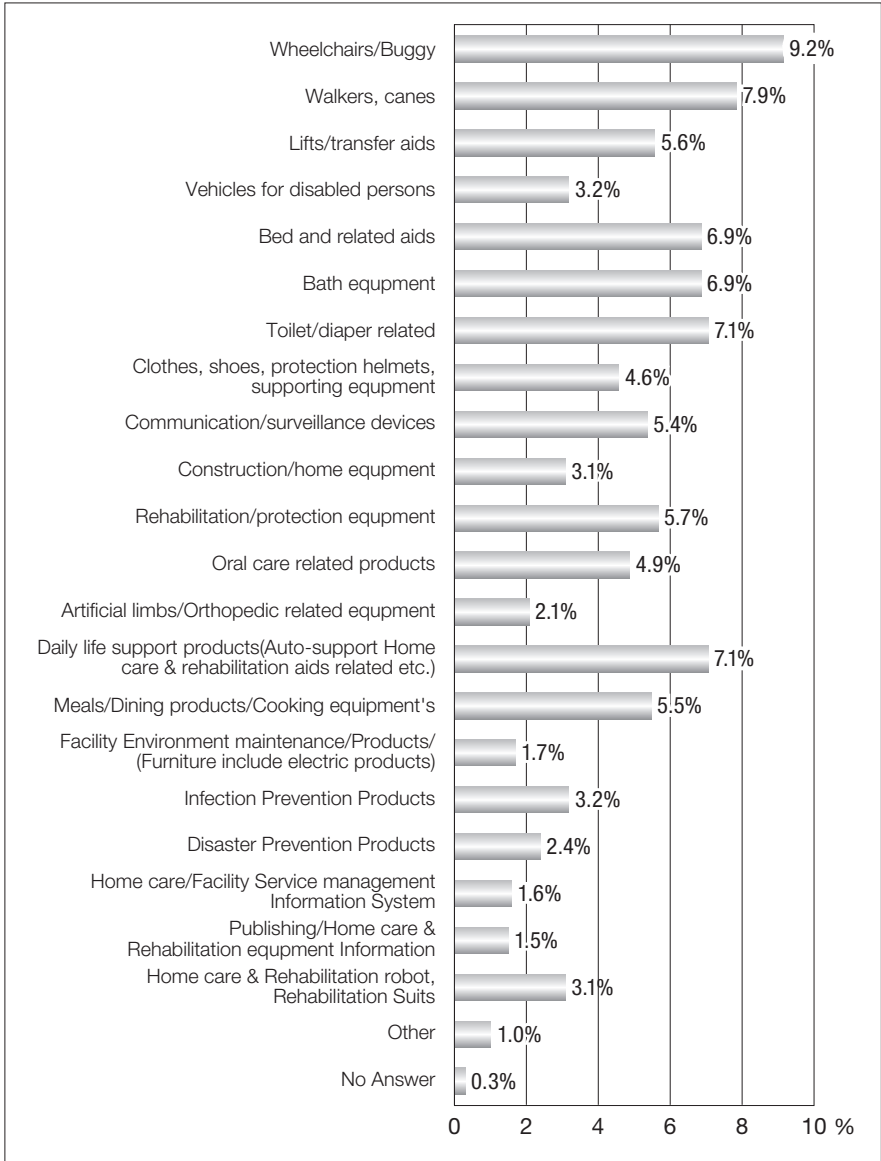

Pre-registration required **PRE-REG**

8 | Visitor Questionnaire Results (6,533 answers, ①～③ multiple answers allowed)

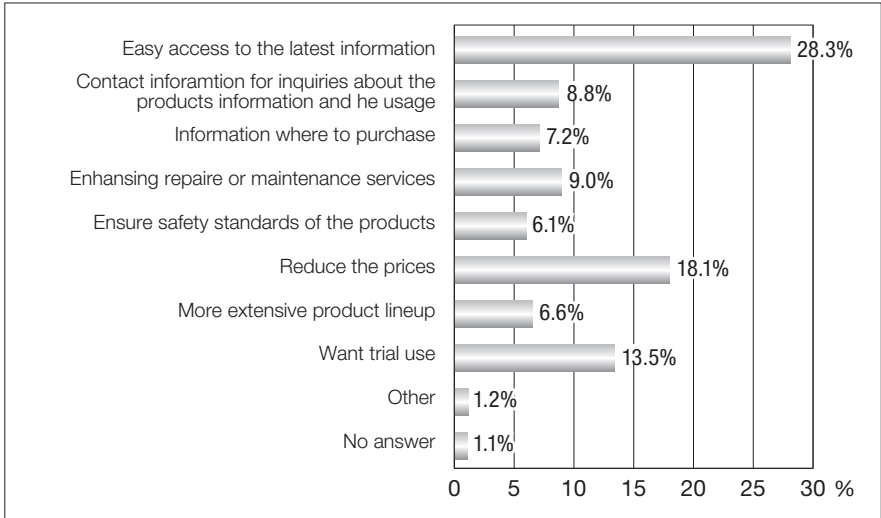

① Purpose for visiting H.C.R. 2019

② Category of products you are interested in

③ Requests on the use of homecare and rehabilitation equipments

④ Visitors comments on homecare and rehabilitation equipmentequipment

1. We hope that product development of welfare equipment should proceed carefully with exchanging opinions with many facility staff and through trials by users.
2. I want simple and safe products that can be used by people of all ages.
3. Like to have products that are hygienic and easy to maintain.
4. It would be nice if there were places and opportunities nearby to see new products that could be used for home care, which could be used together.
5. I want welfare equipment for people with intellectual disabilities and developmental disabilities to spread more.
6. Welfare equipment for children were rather few. I want cute and easy to use products for children.
7. I would like to know both advantages of using welfare equipment but also its disadvantages.
8. I want exhibitors to be accurate on the product catalog where I found some discrepancies between its actual size or image.
9. I want nursing products that do not look like a care procut but a daily procutd. (especially clothes).
10. I want easy and cost conscious welfare equipment rental service.
11. I find inadequacies in the maintenance system. Expect the improvement on repairs and aster care.
12. It is better if I can repare products on my own.
13. Creative products to add to the existing products.
14. I want more products that can be adjusted to suit the body shape by changing the parts.
15. Isn't it possible to develop IT equipment options such as "free program compatible products that can respond to individual requests"?
16. A device in good design and easy to use for going out.
17. Products for patients with dementia
18. Welfare equipment and tools to ease communication (cards, etc.)
19. Want to know what to do when an electric welfare equipment cannot be used due to blackout or failure of electricity
20. Car sharing has become popular, hope to have othre sharing systems.

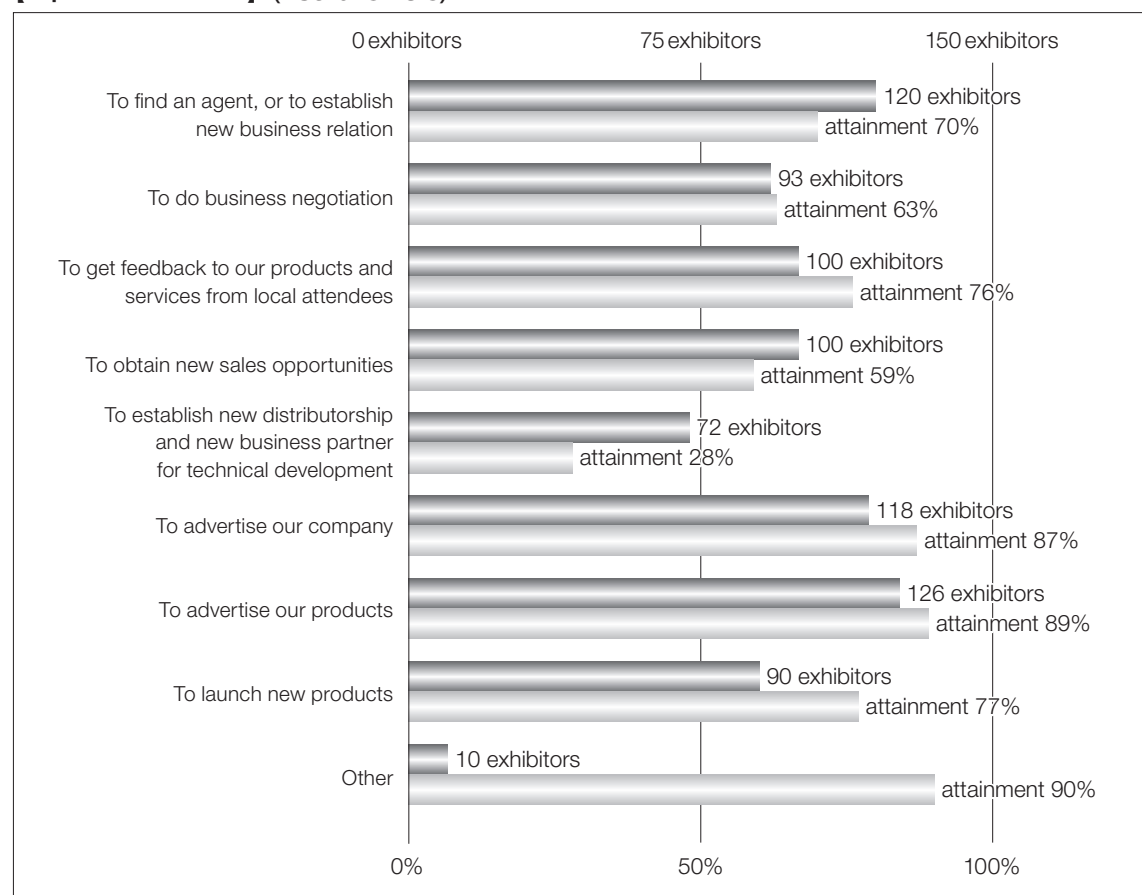

⑤ Visitors comments on H.C.R. exhibition

1. HCR has been evolving year by year, and it has been evaluated that there are many elements that are flourishing every time.
2. It is an exhibition that attracts a lot of attention, and it is also an excellent opportunity for companies to announce new products with the aim of HCR. I'm always looking forward to it.
3. I was able to get the equipment information I wanted, which I could not know from the catalog alone. The result was as expected.
4. A large-scale exhibition where many exhibitors gathered together in one place to present visitors the latest equipment with demonstrations, expanding our knowledge.
5. The exhibit zones were divided in an easy-to-understand manner and it was easy to go around with purpose. The aplication guidance requires to be improved, though it was useful for finding the booth you wanted to find, and you could see it efficiently.
6. I was impressed with the idea and design of overseas products, and compared with other countries'. Domestic developers' products were very impressed with the innovative ideas and responsibilities for users.
7. There were many products on display, the information we were looking for was found, and new connections with various companies were made. In addition, I was able to see and try out the most advanced products and technologies that were usually developed by connected companies.
8. We hope to see more products related to excrement care products such as diapers and nursing food.
9. While there are not many welfare equipment exhibitions specialized for children, gChildren's Square h is very good. Many kinds of products for children were introduced.
10. It would be good if there were more exhibits for visually handicapped / demented people and communication support devices.
11. Although there was a certain distance between the exhibition halls, the space in the halls was generally wide, and it was easy to see because it could be moved by wheelchairs.
12. This new venue had the merit of being able to enter each exhibition hall from various directions, but there were also places where the direction of movement of visitors crossed in addition to long lead wires.
13. I got more motivated. There are many products and information that can be used in the facility where I am working as a nursing staff.
14. I visited HCR to get to AI-related information. It was very productive visit to see and feel that AI industry has really started.
15. Every year, I am impressed by new and improved products, and we appreciate the effort to devise quickness and convenience. I hope to visit next year.
16. Visiting every year to see various welfare equipment with my own eyes is very useful for nursing care. We hope H.C.R. will be the long lasting platform for care workers.
17. I have participated for over 20 years and have been able to get good information every year. I feel the enthusiasm of the people concerned and feel that every time I came here.
18. I was impressed with the wheelchair for CYBATHLON that was with the latest technology.
19. The number of disaster prevention-related welfare equipment exhibits should increase. In addition, it is better to learn more about how welfare equipment is used in disasters and what problems it has.
20. I would like to see more exhibits on housing equipment, in particular, something related to the refurbishment and reuse of used properties in response to recent welfare needs.
21. It would be nice to see a booth displaying exhibits in a realistice space that fits in with Japanese housing standard (size).

## 9 | Exhibitor Questionnaire Results

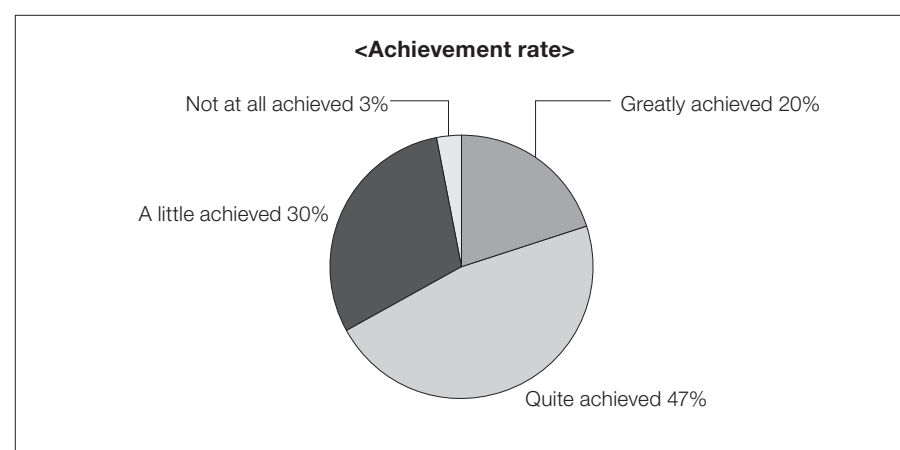

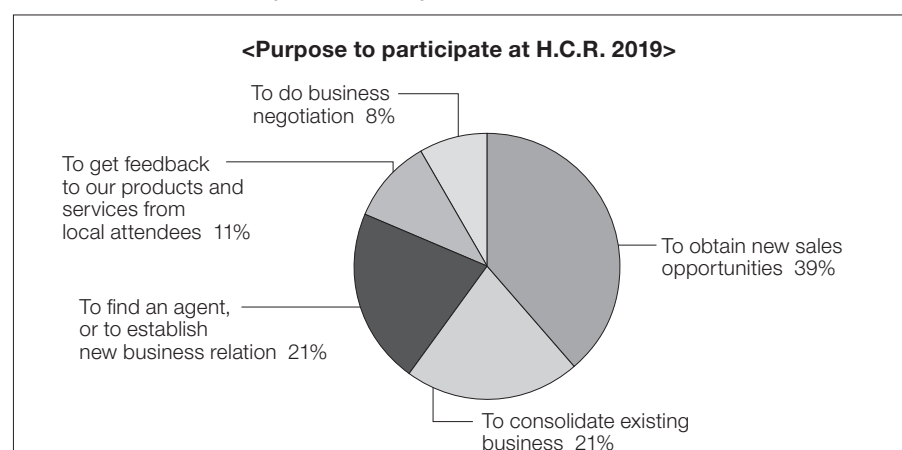

### 1 Purpose to participate at H.C.R. 2019 and the achievement rate

**[Japanese exhibitors] (139 answers)**

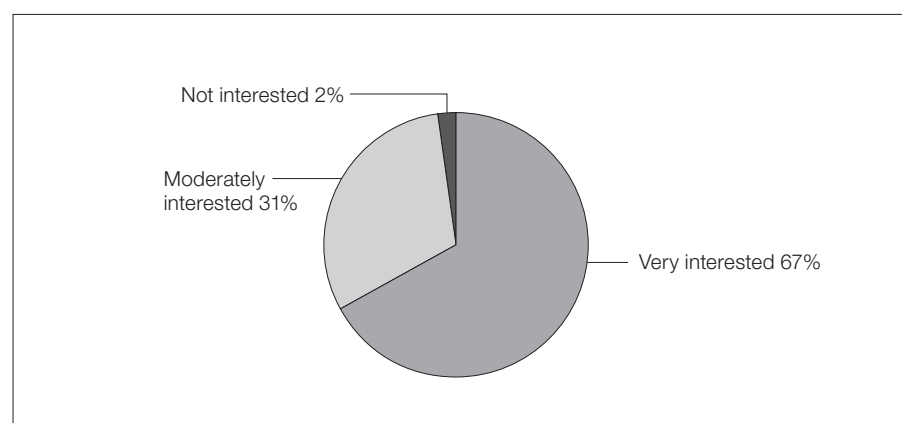

attainment : Sum of [i. Greatly achieved] and [ii. Quite achieved] from 4 choices; [iii. A little achieved] [iv. Not at all achieved].

**[Overseas exhibitors] (39 answers)**

### 2 Are you interested in participating at H.C.R. 2020?

**[Japanese & overseas exhibitors] (164 answers)**

#### Comments

- To have feedback and responses from visitors
- Presentation of the achievements of the business subsidized by our organization
- To conduct market research
- To increase sales performance of our publications
- Performance of a survey of needs for a product under development
- To collect information of the industry trends
- Information exchange between users and supporters

### 3 Exhibitor's comments and suggestions

- Appreciated to have many customers, some of them claimed that it was not easy to find our booth due to the hall change.
- The way of providing information to visitors using apps(\*) was devised, such as in-venue guidance and product search. \*Provided in Japanese only.
- Had a booth in the new South Hall was much better solution to have an extensive conversation with visitors. Less stress with crowdness and its frustration.
- We exhibited at the new South Hall, there was no confusion of routing directions, and the loading and unloading was well organized in appropriate and smooth manners.
- I felt that wheelchair visitors had problems with the size and number of elevators and the distance between halls. Some customers had to visit two days because they couldn't go around easily.
- I would like to make a new visitor category, "OVERSEAS" to give appropriate service
- It would be more beneficial and convenient if H.C.R. Guidebook publishes online (E-book).
- H.C.R. is a platform as important contact points with consumers and our sales people because of its scale, and it is an effective place to exchange opinions for information sharing.
- We introduced our products to some overseas exhibitors through embassies personnels. It was very fruitful and informative on product development.
- I hope to have some new presentations related to Tokyo Olympic Games to attract and collect visitors regardless of location.

10 Promotional Activities\*

To promote H.C.R. 2019, 630,000 postcards for direct mailing, 5,000 posters, and 320,000 flyers were distributed to H.C.R. exhibitors and supporting organizations, etc. In addition, H.C.R. News 2019 and press releases were regularly released to the press and related journalists. H.C.R. official site was revised continually to update the information. H.C.R. smartphone application for visitors was enhanced for easier access to the special site's information as well as to the exhibits. H.C.R. 2019 has been reported in the programs and articles of the listed media.
